Many schools throughout the Kansas City metropolitan area are equipped with Automated Weather Source systems and make up KCTV's Neighborhood Weather Network. The systems are designed so students and teachers can access their own local weather stations or any other remote station on the network and view the data collected in a number of different formats. This data can be integrated into a hands-on classroom curriculum, including lesson packs for all grade levels. The different weather networks are also used during newscasts to show current weather conditions at different locations throughout the community.
